

# Regular Languages and Finite State Machines

Spencer Hirsch, Thomas Johnson, Tyler Gutowski, Remington Greko

January 31, 2023

1. Read the Wikipedia article on regular grammars. Summarize the salient points.
2. What is a Deterministic Finite Acceptor (DFA)
3. What is a Non-Deterministic Finite Acceptor (NFA)
4. Explain why the languages accepted by DFAs and NFAs are the equivalent.
5. Give a recursive definition of *regular expression* over an alphabet  $\Sigma$ .
6. Confirm you know how to use operating system commands to find regular expressions in a file.
